Subject: Portland Harbor RI Section 5 - Surface water

Jim and Gene – This is how I plan to proceed with this section. There will be a discussion of each of the ICs with regard to detection, exceedance of AWQCs (HH, MCL, Eco chronic), and location. Highest concentrations and flow regimes will be noted. The information on the 4 ICs with regard to their hydrophobic nature will be moved to a subsection at the end of this discussion titled “Site-Specific Evaluation of Hydrophobic Contaminants”. I will include the figures you recommended, but I may have additional figures or tables to include. I plan to work on this later this week and will hopefully have some direction for you by Friday for any additional needs. Further, Appendix D3.3 will need modification. I plan to incorporate information from Appendix C of the Draft FS. Let me know if you have any issues with this plan.

Regards,

Kristine Koch
